

What is it?

Improve your well-being for good

The Body Boost Bed is a state-of-the-art whole-body red light therapy bed. It emits red, blue and near-infrared light across 142,000+ frequencies to stimulate your cells, slow ageing and support lasting health – a gentle, natural and safe photobiomodulation (PBM) therapy that helps your body convert light into cellular energy (ATP).

TRUSTED ACROSS SECTORS

- Medical Centres & Clinics
- Physiotherapy & Osteopathy
- Spas & Wellness Centres
- High-Performance Sport

THE EXPERTS BEHIND IT

Dr. Borko B. Djordjevic
Plastic & reconstructive surgery

Board-qualified (ABPRS) and AACS member, trained at Stanford and Northwestern; former chief resident at Riverside Methodist Hospital. Published in numerous medical books and journals.

Dr. Vujadin M. Mujović
Medical physiology

Full professor (Belgrade), NIH grantee and Tulane University fellow. Member of the American Physiological Society and the New York Academy of Sciences; 615+ scientific articles.

Ljiljana Jovanović
Biochemistry & plastic surgery

15+ years at the University Clinic for Plastic Surgery, Belgrade, with outcomes across 1,500+ patients. Co-author of three books and 30+ scientific articles.

Exclusive distributor of the Body Boost Bed – the new generation of medical & aesthetic photobiomodulation.

Red light therapy bed

Musculoskeletal pain · sports injuries · anti-ageing · blood circulation

CE MEDICAL · FDA MED S9001

Medicine of the future.

01 - Pain & recovery

Chronic & acute pain, sports injury

Red and near-infrared light is absorbed by chromophores in the mitochondria, stored as ATP, then used to repair tissue, reduce pain and restore normal biological function.

Beneficial in three areas

- Inflammatory conditions (bursitis, tendinitis, arthritis).
- Wound care & tissue repair (ulcers, fractures, tendon & ligament tears).
- Pain relief (back & neck, carpal tunnel, tennis & golfer's elbow).

Also acts on

- Joint mobility & muscle performance.
- Post-exercise pain & inflammation.
- Blood circulation.

02 - Oxidative stress

Oxidative stress & circulation

The Body Boost Bed combats oxidative stress and improves blood circulation. Validated by research – notably that of neurologist C. Norman Shealy – it amplifies key hormones and enzymes supporting cellular health and repair.

Key benefits

- **Reduced oxidative stress** – neutralises free radicals.
- **Optimised circulation** – boosts microcirculation and tissue repair.
- **Hormonal boost** – noradrenaline, serotonin, melatonin.
- **Faster recovery** – ideal after injury, including nerve damage.

An innovative method to preserve your overall health, combat oxidative stress and support healthy circulation.

03 - Anti-ageing

Anti-ageing & skin repair

A pillar of regenerative medicine that encourages the natural repair of tissues.

Its action on fibroblasts boosts ATP production and the synthesis of collagen and elastin – making skin firmer, smoother and younger. It also relieves acne, psoriasis, eczema and dermatitis, with visible progress after 3 to 10 sessions.

Just two sessions a week over five weeks deliver lasting results, and it pairs perfectly with peels, microdermabrasion and IPL – without side effects or downtime.

The Body Boost Bed in a Bioledtherapy partner centre.
